Abstract. Assertion-based treatments for stuttering have historically been more popular than evidence-based treatments. In this paper it is argued that the use of evidence-based

# Acces PDF Evidence Based Treatment Of Stuttering

treatments for stuttering is professionally empowering for clinicians, but that the use of assertion-based treatments is a circular process that inhibits professional development.

An evidence-based framework can be described as an empirically-driven, measurement-based, client-sensitive approach for selecting treatments. It is believed that using such a framework is more likely to result in a clinically significant outcome. For this paper, a clinically significant outcome was
