FOX recommends that riders on the 2015 36 FLOAT start out with your rebound set 13 clicks out (counter-clockwise) from full in (fully clockwise). Rebound controls the rate of speed at which the fork extends after compressing. Turning the knob clockwise (in) slows down rebound; turning the knob counter-clockwise (out) speeds up rebound.

Using the 36 TALAS Air Spring Settings table below, pump your fork to the appropriate setting using the FOX High Pressure Pump, then remove the pump. Install a zip tie with light friction on the upper tube and push it down until it contacts the fork seal. Carefully sit on the bike and assume a normal riding position.

1. The Fox 36 should be installed by a qualified bicycle mechanic. Forks installed improperly are dangerous and can cause loss of control and serious or fatal injuries. 2. Remove existing fork from the bicycle. Remove the crown race from the fork. Measure the steerer tube length of the existing fork. Transfer this measurement to the Fox 36 steerer.
