Impco has the following explanation for fuel mixture adjustments: There are three carburetor adjustments. The idle speed adjustment controls the degree of opening of the butterfly valve at idle, the same as the adjustment on a gasoline carburetor.

Impco Fuel Mixtures - Raso Enterprises

If the system is functioning properly, the motor should come close to stalling as the RPMs drop. Let the plunger pop out and the motor should return to operation. Adjust the air/fuel mixture if pushing the primer causes the engine activity to increase. Use a screwdriver to turn the screw on the vaporizer's mixer.

How to Troubleshoot an IMPCO Propane Vaporizer | Hunker

Browse By. Category. 300A. The Model 300A mixer is a single-diaphragm air valve for applications. It offers a down-draft air inlet that can be used for remote air filtration or open-element type air filters. This unit is available for LPG Vapor and Natural Gas applications with air flow requirements up to 348 CFM (164 L/s) or 432 CFM (204 L/s) depending on the part number.
