Inventories ...~~

Setup Reduction.

Setup Reduction is a technique useful for level load balancing, a key strategy for lean deployment.

Setup Time is defined as the time to change from the last item of the previous order to the first good item of

Online Library

Set Up Time

the next order. Setup includes preparation, replacement, location and adjustment activities (see below).

When analyzing setup activities, note whether the activity is internal or external.

significant
investment) is:

~~Set-up Time
Reduction Process~~

~~An easy guide
Time Delivery
The Ability To
Change Quickly~~

Setup reduction
should be
approached in four
phases or stages as
illustrated below. It is
usually best to repeat
the process through
several iterations

Online Library

Set Up Time

spaced several months apart. The initial phases of setup reduction (SMED) are straightforward and easy, yet often bring the greatest benefits.

~~How To Reduce Setup Time ...{Strategies}~~

Reductions in set-up time have almost an impact from one-to-one for the reduction
